FACTSHEET

BE READY

European Partnership for Pandemic Preparedness

# Pandemic Preparedness and Response Observatory

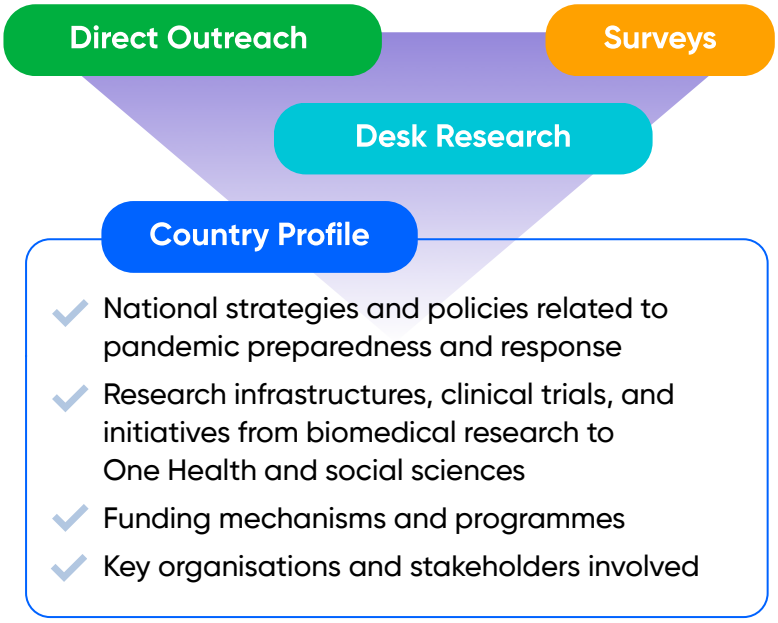

The **Pandemic Preparedness and Response Observatory** is a central information hub that brings together publicly available knowledge on how European countries organise their research and innovation (R&I) efforts for pandemic preparedness and response.

## Why is it important?

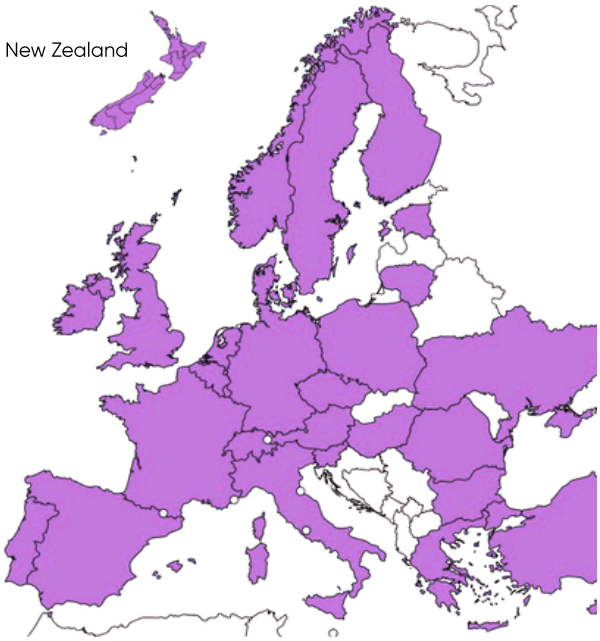

A lot of valuable pandemic-related work is already happening across Europe, yet **information is scattered and often difficult to find**. The Observatory:

- Improves transparency
- Facilitates knowledge sharing
- Promotes collaboration instead of duplication
- Supports better and faster decision-making

## How is the information compiled?

## Available Country Profiles in the Observatory

To ensure accuracy and completeness, the Observatory is continuously updated and expanded. Stakeholders are actively invited to provide corrections or new input at:

**BEREADY.Observatory@vlaanderen.be**

## What comes next?

The Observatory will evolve further within **BE READY**, with new tools such as:

- **BE READY Radar** – tracking emerging trends and needs
- **BE READY Accelerator** – fostering innovation uptake
- **A searchable database** – allowing users to filter and explore data more easily

**Access the OBSERVATORY on the BE READY website**

Co-funded by the European Union

The BE READY Partnership is co-funded by the European Union under grant agreement No 101226682. Views and opinions expressed are however those of the authors only and do not necessarily reflect those of the European Union or the granting authority. Neither the European Union nor the granting authority can be held responsible for them.
